

NORA works with Organ Procurement Organizations, Transplant Centers, Living Donor Networks, and Laboratories throughout the country in creating transportation systems that meet the distinctive needs of that particular program.

All of our resources, time and expertise are motivated to support the organ transplant community. We understand critical time management, coordinating logistics between numerous facilities, and we have the expertise necessary to bring it all together flawlessly.

Look for Don Jones and Cole Bachelder to see how NORA can support your program's transportation services.

A sophisticated **GPS Tracking System** is placed in **every dedicated vehicle** bringing a level of efficiency and accuracy to our clients.

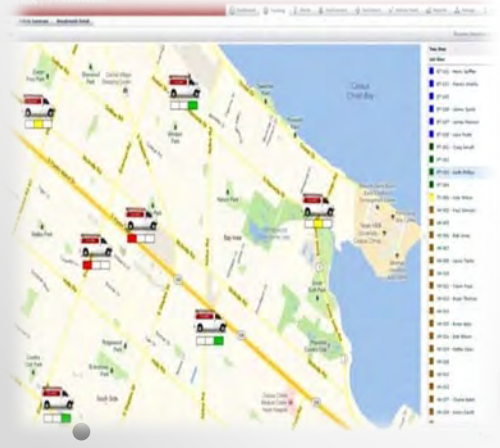

This system will show us exactly where our vehicles are located, in **real time**, so our Dispatch Center will be able to utilize the closest vehicle, making our activation times achievable.

Your team will **always** get a live person in our 24/7/365 Dispatch Center, along with a Supervisor, so you will never be subjected to an annoying voice mail system or answering service.

# Dispatch Center

NORA's state of the art dispatch center is equipped with backup systems, generators, real time software and the most up to date resources to better assist your staff and mitigate any problems before they occur.

Ability to monitor all aircrafts in real time for tracking purposes plus weather updates help with flight planning, scheduling, and logistics coordination.

Coordination of ground transports when weather redirects aircraft to a different location, is an invaluable tool in meeting critical time requirements.

## Ground Transportation

- 30 Minute response time.
- Newer, 5 star safety rated, 4 wheel drive, vehicles.
- Striped, lights and sirens, clearly identified as an organ recovery vehicle.
- 24/7/365 availability.
- Arrange, follow and update all relevant parties throughout transport.
- Rear controls for heat, AC and power ports.
- WIFI capability.
- Automobile insurance \$2 Million.

# NORA

NATIONWIDE ORGAN RECOVERY  
TRANSPORT ALLIANCE

24 Hour Dispatch  
855-554-6672

- Minimum 3 year EMS driving experience required.
- Criminal background checks.
- Random Drug testing.
- Pass required driver training programs.
- Blood borne pathogen and HIPPA trained.
- Uniformed and ID badges required.

## Drivers

## Air Transportation and Other Services

### Private Air Charter

- Vetted, proprietary nationwide network of private air carriers.
- All of our aircraft will be able to accommodate a minimum of 4 to 6 passengers with room for equipment storage.
- Larger aircraft with capacity of 8+ passengers will also be a part of our diversified fleet.
- Pricing - varies dependent upon aircraft type.
- \$100,000,000 non-owned aircraft insurance.

### On Board Escort and Shipping

- The Transportation Security Administration vetted NORA, granting Known Shipper status allowing NORA to provide either an on-board escort or shipping service for human organs and blood samples with all the major commercial airline carriers.
- Hybrid arrangements can be made between grounds, charter, OBC and shipping.

### Traveling Phlebotomist

Blood draws performed in the comfort of the prospective donor's environment. NORA created, organized, and implemented this pilot program within 60 days.
