The European HVO market has seen substantial growth over the last 5 years, with more and more oil majors, such as Neste, Total, ENI and dedicated fuels producers alike continuing to invest heavily in HVO production units. With the continued focus on reducing GHG and CO2 emissions both in Europe, and across the globe, the demand for more sustainable fuels has never been higher. However with increasing competition from Asia and the US, the need for sustainable feedstocks, increasing regulatory pressures, price fluctuation, the need for more investment in R&D and adaptation to new technologies shows that the industry is still facing some significant challenges.

Already in its 13th edition of a very successful series, the two day Oleofuels 2022 conference will bring together senior representatives from the biodiesel, renewable diesel and HVO industries to discuss the latest market advancements, developments & business opportunities.

## Who will be attending?

- Biodiesel producers
- HVO/HEFA producers
- Downstream oil companies/HVO producers/ Researchers
- Process technology providers
- Catalyst companies
- Fuel Traders/Brokers
- Consultants
- Crop science/feedstock companies/ plantation owners
- Governments Representatives
