ACI's European Environmental Ports Conference will return for its 4th edition on 3rd & 4th May 2022. Climate Change has led to the IMO and policy makers of the Maritime Industry to develop environmental regulations which require ports to redefine their approaches to air and water quality and waste management, as well as reassess which forms of fuel will minimize damage to the ecological system.

The conference will bring to light the latest challenges and developments currently being faced in the industry and what is foreseen in the future. The two day conference brings together senior experts from various industries, such as the global port community and shipping companies, environmental policy – makers, academic experts, and consultants. They will be proving informative presentations on the very latest challenges, solutions and developments in reducing emissions, pollution and living in a more sustainable way.

Commercial & Sponsorship Opportunities

With leading companies and organizations from the industry attending and speaking at our event, we have the perfect vehicle to provide outstanding exposure to a senior level audience.
