Europe has set itself goals to ensure a sustainable future and stop global warming. Part of this is using renewable energy to create carbon neutral or negative fuels for a variety of industries, such as automotive, maritime and aviation.

Following our successful 2nd edition last year, the European E-Fuels Conference will discuss required policies and regulations for the e-fuels industry, analysis of the market, how e-fuels can help meet climate change demands as well as the latest technology developments for the creation of e-fuels.

The conference will bring together distinct and influential stakeholders from the value chain to discuss the latest challenges and developments making an impact on the industry.

Join us in Hamburg, Germany for two days of exchanging perspectives, learning and excellent networking opportunities with your peers.

Registration Is Simple

If you would like to register for this event or wish to find out more information, please contact: Marcin Janecki using any of the following methods:

DAY 0

Tuesday 8th November 2022

SITE VISIT

Visit to the Mabanft PtL plant

- The demonstration project is the world's first power-to-liquid concept on a technical scale to date, supplying e-fuels and synthetic hydrocarbons at the same time. These are further processed and marketed as a climate-friendly raw material into chemical-pharmaceutical specialities. The project thus goes beyond pure mobility applications.
- Presentation and operation of the PTL demonstration plant.
- Today's petroleum industry on the way to climate neutrality
- Discussion with experts on current PtX regulations
